Fire Safety in the Workplace

Course Content

This course will provide course delegates with a theoretical and practical understanding of the typical functions of a fire warden or fire marshal within a workplace.

Additionally, this course will give delegates an understanding of how fires start and propagate within buildings and the tools to assist with the development and implementation of emergency evacuation arrangements.

On completion of the course, delegates should be able to:

- ❖ Explain the common causes of fire in the workplace
- ❖ Explain how fire spreads within buildings
- ❖ Outline typical functions of the Emergency Team including Fire Wardens or Marshals and Fire Co-ordinators
- ❖ Identify the requirements of The Regulatory Reform (Fire Safety) Order 2005
- ❖ Outline the main elements of a fire risk assessment
- ❖ Discuss types of fire extinguishers and how they can be used in emergencies
- ❖ Outline the factors to be considered when developing emergency evacuation training, arrangements, and practice fire drills
- ❖ Assist the company in simulated and live emergency evacuation situations
- ❖ Develop arrangements for post evacuation evaluation and debriefing

Course Duration

2 hours

Who Should Attend?

Anyone with responsibility for assisting with emergency evacuation arrangements in their workplace, including fire co-ordinators, fire wardens or marshals, supervisors/managers with fire safety responsibilities or health and safety representatives

Location

The course can be delivered to a maximum of fifteen delegates at any one time either on the employer's premises or using QTS' training facility

Entry Requirements

None

Accreditation & Assessment

All delegates are issued with an attendance certificate upon completion of the course
